

'Garland' LED Pendant Lights

TECLED's range of Australian made GARLAND pendants offer a unique and elegant option for space and feature lighting. Constructed from fabricated aluminium casing and opal acrylic diffusers, the Garland is available in standard shapes with fully customisable options.

Internal illumination is by LED strip lighting, varying from 2200K to 6500K or even RGB or RGBW.

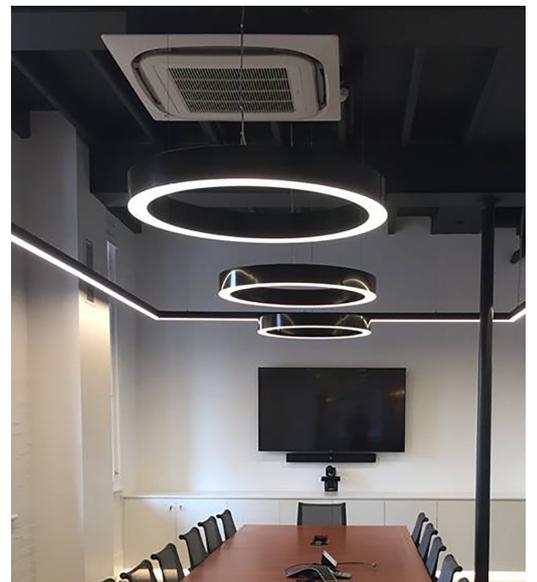

Units may be installed in singles or in groups, suspended or flush wall/ceiling mounted. The slim profile allows quick and easy installation and is rated IP20.

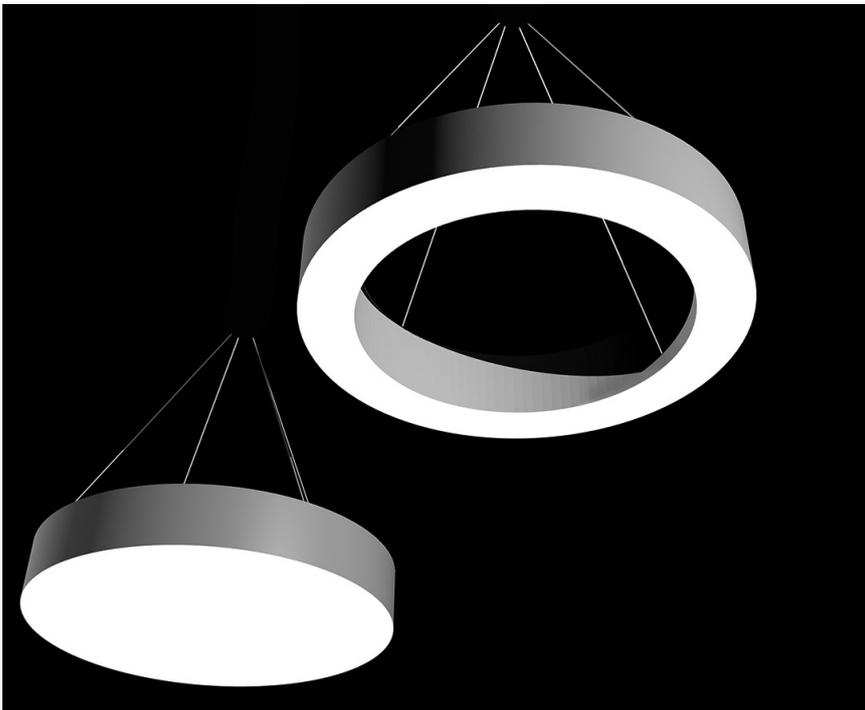

Suspended

Surface mounted

Endless options

With very few limitations, Garland pendant lights can be manufactured to your particular design, shape, colour or size.

Size can range from 300mm to 4m wide, have a solid or donut face, be symmetrical or asymmetrical and be horizontally or vertically installed.

The only constant is the soft, effective light it produces.

Standard Carcass Colours

Matt White

Black Satin

Brushed Gold

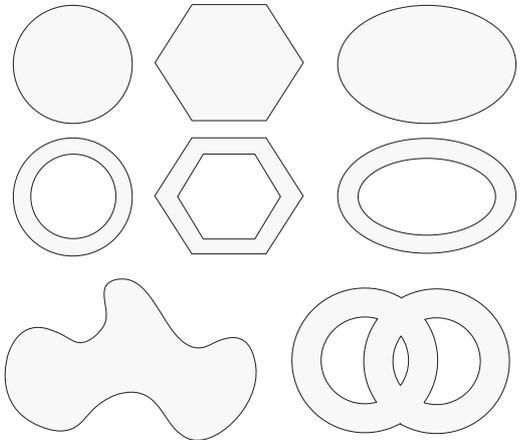

Brushed Silver

Mirror Silver

Custom colours also available.

Pendant Shapes

Donut matt black carcass with inward facing mini LED bulbs

Donut matt black carcass with mini LED downlights
