

See our LED lights in action in this flawless Hastings Parade Project!

TecLED worked with architect and interior designer, Justine Reef, on renovations to her own home. The house is located minutes from Bondi Beach, where lighting is key to enhance the impeccable details and contributes to a resort aesthetic. Lighting products were used for both the interior and exterior of the house to make each space unique and welcoming.

Justine Reef is an independent architect who bases the success of her work on the relationship she achieves with each client. She has managed to create beautiful and unique homes that enhance one's living experience. It was inspiring to work with such a creative architect like her!

The project flourished thanks to the collaborative efforts of Joey Pamment, who recently received the MBA NSW "Young Builder of the Year 2022," and John Kaye, the electrician/owner of Safe Electrical. Together, they brought the architects' drawings to life.

TecLED provides a range of style alternatives to ensure that you can select the one that perfectly matches your personality and architectural project. Please get in touch with our friendly LED experts to discuss your unique lighting requirements.
